What is the Commandant’s Safety Action Campaign (CSAC)?

**Commander’s Intent:** To combat the needless loss of life and injury for Marines and Sailors due to mishaps on and off duty.

**Combatting the Blue Threat:** The trends, case studies and analysis found monthly in this Newsletter will be a tool for Small Unit Leaders to educate and empower their Marines and Sailors to end needless mishaps.

- In the last 30 months we have lost 208 Marines to mishaps—**this is unacceptable.**
- The goal of the Safety Action Campaign is to reduce mishap fatalities by 50% by the end of FY19.
- Review ALMAR 016/18 for specified tasks for Commanding Officers and Sergeants Major.

**Enduring Themes of the CSAC:**
- Marines Take Care of Their Own (One of six Enduring Principles published in MCDP 1-0).
- Safety is not a separate activity, but the byproduct of professionally executed / risk managed operations.
- Every Marine is responsible for breaking the chain of events that leads to a mishap.

What **ACTION** can we take to combat the Blue Threat?

### ALL LEADERS

**Risk Management is a leadership competency.**
- All small unit leaders need to teach their junior Marines how to translate on-duty risk management TTPs to off-duty planning and execution.
- Give greater responsibility for Risk Management and Safety to your small unit and NCO leaders, train them accordingly, and hold them accountable for what they can control.

### NCOs

Your leadership at the small unit level is vital to preventing these senseless losses.
- Teach your Marines the fundamentals of risk management.
- Conduct risk assessments of your junior Marines’ leave and liberty activities, informed by the significant events in this newsletter.
- If their plan is inadequate, help them create a plan to mitigate the risks or recommend disapproval of leave/liberty up the chain of command.
- Hold your Marines accountable for executing the plan as briefed.
- Step in to **BREAK THE CHAIN** of events that leads to a mishap. Take action!

### EVERY MARINE

Each of us is responsible for our actions and decisions, on and off duty.
- Approach your time off as though your life depends on it!
- Do not allow enthusiasm to cloud your judgment regarding risks.

As you will see in the coming pages (and coming issues) it can happen to you.

**Did You Know?**

Motor Vehicle (MV) / Pedestrian deaths are a national problem. [https://www.nsc.org/road-safety/safety-topics/distracted-driving](https://www.nsc.org/road-safety/safety-topics/distracted-driving)
COMBATTING THE BLUE THREAT
Commandant’s Safety Action Campaign

What Kills Marines? The 80 Percent Solution

Almost 80% come from MVs (54%) and Aviation (25%) MV-2 (motorcycle) = 56 = 27%
MV-4 (car) = 44 = 21%
Pedestrian = 12 = 6%

AVIATION
4 Class A Mishaps resulting in the loss of four Marines, one Sailor, two CH-53Es, and one AV-8B. Our current Class A Flight mishap rate is 2.33, which is better than FY17 (3.99) and our five year average (3.00).

GROUND
2 Class A Mishaps, both of which resulted in death. Significant other on-duty mishaps include four Marines shot during live fire and maneuver training on Range 400 in two separate incidents.

OFF-DUTY
- 9 Class A MV-2 (Motorcycle) Mishaps that resulted in the deaths of ten Marines. Most common causal factors are skill-based errors, often following decision errors.
- 10 Class A MV-4 (Car) Mishaps that resulted in the deaths of ten Marines. Most incidents occur late at night, suggesting that fatigue may have contributed. Excessive speed for conditions is common. Seat belts were not worn in several incidents.
- 1 Class A Pedestrian Mishap that resulted in the death of one Marine.
- 5 Class A Other Mishaps that resulted in the deaths of four Marines. Alcohol is often a contributing factor.

How are we doing in FY18 so far? We have had...

ACTION—Combat the 80%!
- Focus on preventing MV and Aviation mishaps through deliberate Risk Management.
- Hold Marines accountable for compliance with applicable orders and policies.
